# Certificate In Mobile App Development

Course Details

Dive into the world of Android app development with this comprehensive course! We'll take you from complete beginner to building your own apps. No coding experience? No worries! This course will teach you the basics of Java programming, the foundation for most Android apps. We'll also cover object-oriented programming concepts, a powerful approach to structuring your code.

Ready to get hands-on? The course features a series of projects where you'll build real apps! You'll learn to work with essential UI elements like buttons and menus, and explore layouts and animations to bring your apps to life. Finally, you'll learn the secrets of publishing your apps on the Google Play Store, making them available to the world.

Fees ₹ 6000
(can be paid in 4 Installments)

Certificate In Mobile App Development

Syllabus & Skills covered (120 hours)

The course covers everything you need to know to get started, from the history of Android to the latest features. You'll learn about the different components that make up an Android app, as well as how to use Android Studio, the official IDE for Android development.

Here are some of the key topics that the course covers:

- Get started with the fundamentals of the Android ecosystem.
- Understand the underlying structure and components of the Android operating system.
- Learn to navigate and utilize the essential tools within the Android Studio IDE.
- Master OOP principles crucial for building robust Android applications.
- Learn the process of packaging and publishing your Android applications.
- Discover various methods for storing and managing application data on Android.
- Get acquainted with the Kotlin programming language for modern Android development.
