

Certificate in Fundamentals of HTML and Introduction to CSS

The Certificate in Web Development is a comprehensive program designed to equip learners with the foundational and advanced skills needed to design, build, and publish modern websites. Starting with core internet and networking concepts, the course guides students through the essentials of HTML, CSS, multimedia integration, and responsive web design. Learners gain hands-on experience in structuring content, styling layouts, and embedding interactive elements to create visually appealing and user-friendly websites.

By the end of the course, students will be able to combine HTML, CSS, and JavaScript to deliver functional, scalable, and SEO-optimized web solutions. Whether you're a beginner looking to enter the field of web development or someone aiming to enhance your technical skillset, this course offers the tools and practical knowledge to build high-quality websites that meet current industry standards.

Syllabus & Skills covered (60 hours)

- Internet & Networking: Understand internet fundamentals, protocols, domains, and applications.
- Website Creation: Build and publish functional websites with proper structure and categorization.
- HTML Proficiency: Design web pages using structured HTML elements and attributes.
- Navigation & Linking: Implement internal and external links for smooth user navigation.
- Data Structuring: Use lists and tables with advanced formatting for data presentation.
- CSS Styling: Style web pages using CSS with advanced selectors and layout techniques.
- Advanced Web Design: Apply HTML5 features, forms, and multimedia elements for dynamic design.
- Graphics & Visuals: Create scalable graphics with SVG and canvas, including visual effects.
- Responsive Design: Develop SEO-friendly, mobile-responsive web pages using meta tags and viewports.
- Full Web Integration: Combine HTML, CSS, and JavaScript to build interactive, professional-grade websites.
